

Digitalisation in Passenger and Freight Rail Traffic – Solutions of the Railway Industry in Germany

InnoTrans Convention

Palais am Funkturm, 21th September 2016

www.bahnindustrie.info

The German Railway Industry Association

- The German Railway Industry Association (VDB) is the **industrial association** of the **railway equipment and technology manufacturers** in Germany.
- It represents the interests of more than **185 member companies** – many of them are worldwide leading **system integrators** and highly specialised **medium-sized equipment suppliers**.
- The VDB members design and manufacture systems and components for **rail vehicles** and their **infrastructure**. In addition to that they offer a broad range of **services** for the railway technology applications.
- The VDB members employ 51,900 people in Germany alone.

The VDB member companies

1.	Dr. Josef Doppelbauer, European Union Agency for Railways	Automation - Prospects for the European Railway System
2.	Dr. Martin Lange, Knorr-Bremse Systeme für Schienenfahrzeuge GmbH	Digital solutions for rail vehicles
3.	Manuel Mang, Interautomation Deutschland GmbH	Automatic Passenger Counting in the context of real-time application
4.	Nico Gramenz, Siemens AG	Chances for Operators through Digitalization in the Signalling World
5.	Dr. Andreas Priebe, Scheidt & Bachmann GmbH	The Vinyl-Records-Renaissance Or Is the order “Digital+Networked > Digital > Analog” always true?
6.	Marc Schaffert, IVU Traffic Technologies AG	Optimizing Operations, Cutting Costs, Improving Service – how digitalisation transforms railways
7.	Kay Euler, Deutsche Bahn AG	Mobility of the Future - Digitalisation at Deutsche Bahn AG
